

Dry Chemical Powder Extinguisher

Dry Chemical Powder Extinguishers are completely red with a white coloured band

The powder fire extinguisher is commonly used and suited to fires occurring in the house, boat, garage, car or caravan. They discharge a fine powder that absorbs fuel molecules, depriving the fire of a fuel source.

Look carefully at the extinguisher to determine if it is an ABE or BE unit, as the capabilities are different.

EXTINGUISHER		CLASS OF FIRE					
		A Solids (Wood, Paper, etc.)	B Flammable Liquids	C Flammable Gasses	D** Combustible Metal	E Electrical	F Cooking Oils & Fats
Dry Chemical Powder	ABE	✓	✓	✓	✗	✓	✗
	BE	✗	✓	✓	✗	✓	✓

Never fight a fire alone, always raise the alarm before fighting a fire, and always keep an EXIT behind you.

You are not exempt from smoke inhalation

FOR FIRE EXTINGUISHERS, REMEMBER:

P

PULL

the pin, break the seal and test

A

AIM

at the base of the fire/flames

S
